IT Service Management | Incident Management | ServiceNow

PROFESSIONAL SUMMARY

Results-driven Associate Consultant Engineer with 3+ years of experience in IT Service Management (ITSM), specializing in Incident Management and ServiceNow ticketing. Proven track record of managing end-to-end incident lifecycles, ensuring SLA compliance, and reducing service disruptions. Adept at collaborating with cross-functional teams, improving operational processes, and delivering exceptional service quality in enterprise environments.

CORE COMPETENCIES

Incident Management	ServiceNow Ticketing	SLA Management
IT Service Management	Grafana Dashboards	Process Improvement
Analytical Thinking	Communication Skills	Microsoft Excel

PROFESSIONAL EXPERIENCE

Associate Consultant Engineer | Atos Syntel | June 2022 – Present

- Managed end-to-end incident lifecycle using ServiceNow, ensuring 100% SLA compliance for enterprise clients
- Tracked, prioritized, and resolved IT incidents to minimize service disruption and downtime across production environments
- Led emergency response and critical incident handling, coordinating rapid resolution across technical teams
- Collaborated with cross-functional teams including network, application, and infrastructure groups for faster mean-time-to-resolution (MTTR)
- Monitored system performance and operational metrics using Grafana dashboards to proactively identify and mitigate risks
- Continuously improved ITSM processes by identifying recurring issues and driving root cause analysis (RCA) initiatives
- Maintained detailed incident documentation and reports to support audit readiness and knowledge management

PROJECT EXPERIENCE

Siemens Healthineers SDA LAN | 36 Months

- Supported LAN environment stability and end-to-end incident management activities for Siemens Healthineers infrastructure
- Assisted in monitoring system performance using dashboards, identifying anomalies and escalating critical issues for timely resolution
- Maintained accurate incident records in ServiceNow, contributing to streamlined reporting and SLA adherence

Siemens SAG | 5 months

- Supported LAN environment stability and end-to-end incident management activities for Siemens Healthineers infrastructure
- Assisted in monitoring system performance using dashboards, identifying anomalies and escalating critical issues for timely resolution

- Maintained accurate incident records in ServiceNow, contributing to streamlined reporting and SLA adherence.
